

MASTERCLASSES PROGRAMME 'Policies into Practice'

Venue: Sandton Convention Centre

Sign up for these master classes via marketing.assistant@sanec.co.za or +27 (0) 11 459 2840.

Masterclasses are free to attend and subject to availability.

Monday 24 June

12H30 **'First class second hand equipment'** by Paul de Jong, Sales Manager Middle East & East Africa at the Forkliftcenter

A master class on explaining the reasons, benefits and sustainability of using used equipment

14H00 **'SimPort, an interactive port planning simulation'** by Jeroen Warmerdam, Owner at Tygron
Participants will be grouped into teams and asked to tackle the challenge of building a 2000 hectare large new port expansion and making it economically viable. Participants will gain insight into the benefits of using next generation instruments such as SimPort within large scale infrastructure projects.

Wednesday 26 June

09H00 **'Improving Hinterland Connectivity through Partnerships'** by Eduard Visser, Director Strategy and Innovation, Port of Amsterdam

Port of Amsterdam ensures a safe, swift and environmentally responsible management of shipping traffic within its working area. The exploitation is aimed at port sites (rental and leasing), quays and water. In the entire Amsterdam port region a yearly amount of over 94 million tons of goods is being transhipped.

10H45 **'BAM International – world-wide and in Southern Africa'** by Sila Sarac, Corporate Business Development Officer at BAM International

Thursday 27 June

09H00 **'From Water Treatment Plant to your sink'** by Tarek Bayoumy, Business Development Manager at Coram International

A master class on innovative and sustainable solutions for water purification, disinfection of Water, and the Danger of Chlorine gas!

10H45 **'Remote Sensing – An Integrate Approach'** by Abdul Azziz Cadar, Technical Sales Manager at Fugro

An overview of Remote Sensing technologies will be provided, highlighting the various sensing techniques, parameters, accuracies and principles of operation. Defining the correct surveying parameters and identifying the most suitable Remote Sensing technologies is critical. Applications include infrastructure planning, maintenance, upgrade and asset management.

13H45 **'New Communication Platform for Ports Development'** by Emmie van Halder, Representative of Smart Sensor Solutions

The master class will focus on this new communication platform and the applications that are focussing on ports and infrastructure. With the SSS platform one can monitor things in spaces that you could not monitor before, because of lack of networks, wifi or because the costs would have been prohibitive.

15H00 **'Vision and Value Added on Capacity Building related to Port and Corridor Development'** by Addy Houtappels, Business Development Manager at STC Group

STC-Group, having offices worldwide and training thousands of people annually, will share its vision and value added on capacity building related to port and corridor development.
